REGISTER YOUR DEVICE

1. Your Beacon has an authentication code located on the back of the device near the base.
2. Go to ooze.life/register and use this code to fill out the registration form.
3. Submit the form. Your Beacon is officially registered in our system, and your warranty is activated!

GET STARTED

1. Twist the mouthpiece counter-clockwise to unlock and remove.
2. Use the small dab tool under the cap to load extract into the center of the C-Core dish.
3. Replace the cap.

SETTING UP YOUR BEACON

PRESS THE BUTTON 5X TO TURN ON & OFF.

Press the button 3x to switch between the 3 voltage levels. Each level has a different LED color and heats to a different temperature range:

GREEN
2.7V

BLUE
3.2V

RED
3.7V

EXTRACT VAPORIZER

HOW TO USE

There are 2 ways to operate the Beacon:

MANUAL MODE:

Hold the power button down so the device begins to heat. Inhale and release when you exhale.

SAFE SESH MODE:

Click the button twice to activate sesh mode. The device will heat & LED will flash without you holding the button, and shut off after 15 seconds.

SAFE SESH DURATION

The 3 voltage levels have a **15 second safe sesh** and will stop heating afterwards.

CHARGING

Needs to Charge: 5 red LED flashes.
While Charging: Flashing white LED.
Charge Complete: Solid white LED.
