HOW TO USE THE DUET

1. Pull the base out of the Duet and screw in one or both 510 oil cartridges.
2. Turn the Duet upside down and use the IntelliSwitch (the small switch in the center) to tell the device which cart(s) to use.
    a. *To use both carts, leave the switch in the center.*
    b. *Slide the switch to the left or right to use only that cartridge.*
3. Replace the base in the device.
4. Click the power button 5x to turn the Duet on.
5. To adjust the voltage level, click the button 3x to activate flex temp. Then click the button once to change the level. Wait 3 seconds for flex temp to end.
    a. **Pro Tip: Click the button 4x for an alternate battery view.*
6. Press the button to heat the Duet and take your hit.
    a. **Pro Tip: Press the button twice to activate Prep Mode. This is a 10-second gentle heat cycle that helps clear any clogs in the cartridge airway. We recommend running Prep Mode before each session.*
7. Click the button 5x to turn the Duet off.

CHARGING THE DUET

1. Connect the Type-C charging cable* to your Duet.
2. Use an adapter and wall outlet to charge the device, it will buzz twice when it connects to the power source.
3. Watch the battery percentage climb until it reaches a full charge.
    a. **Pro Tip: You can use the Duet while it charges!*

*The Duet does NOT include a charging cable. Type-C is known as the “universal” cable, so you probably have one already! If not, you can grab one from Oozelife.com.
