HOVER
CONCENTRATE VAPORIZER

QUICK START GUIDE:

1. Remove the base cap and get your quartz tip ready to dab.
2. Click the button 5x to turn the Hover on.
3. Click the button 4x to check battery power.
4. Click the button 3x to change voltage.
5. Click the button 2x for Prep Mode. This runs at 1.8V for 15 seconds; it preheats the tip and clears any clogs in the airway.
6. Insert the Hover's tip into your jar of extract. Press and hold the button to take your hit. The voltage will switch to a stopwatch that times your hit.

> **PRO TIP:** Don't stuff your Hover into your jar and inhale aggressively. Sip it, don't rip it! Lightly tap and HOVER over the wax in your jar for the biggest hits possible.

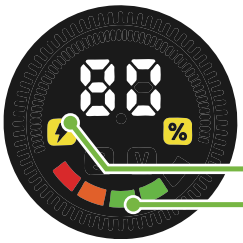

7. The Hover will shut itself off automatically after 10 minutes of inactivity. Or click the button 5x to turn it off manually. Don't forget to replace the cap!
