HOT SPOON
Electronic Extract Tool

HOW TO USE THE HOT SPOON

1. Remove the cap and click the button 5x to turn on.
2. Load extract onto the Hot Spoon's ceramic tip. We recommend starting with a dab the size of a grain of rice.
3. Aim the tip directly over the banger or atomizer, wherever you want to the extract to land.
4. Press the button shine the LED light and heat the tip. Your dab will slide right off the end.
5. Take your dab and enjoy!
6. The Hot Spoon's battery will shut off automatically after 10 minutes, or click the button 5x to turn off. Don't forget to replace the cap.

BATTERY OPERATIONS

Click 5x to turn on and off.

Click 3x to change voltage.

Click 2x for Prep Mode: the light will shine & tip will heat at 1.8V for 15 seconds without holding the button.

We recommend running this cycle before you pick up a dab so it slides off easily. You can also run it after you're done to remove any leftover reside.

CHARGING

Plug a type-c (universal) charging cable into the base of the battery.

The battery light will flash between all colors (green, blue, yellow, red) while it charges.

When it reaches 100%, the light shines green for 1 minute and then shuts off.

You can use the Hot Spoon while it's charging!

SAFE GUARDS

- Keep away from water.
- Only charge indoors.
- Only use in legal and adult use state/providence/country.
- Only use approved Ooze attachments.
- Never leave unattended around children/pets.
- Never disassemble.
